Elementary

### PROFILE

I'm a python backend developer. In several years I learned Python programming language perfectly and took part some interesting projects. I can communicate with team members most times well enough. And also comply to deadline. My purpose only get more experience, teamworking, learning new technologies and tools. Establishing new start-ups is top of them

### WORK EXPERIENCE

#### Python and Computer administrator mentor

Uchkurgan IT School

2020-2022

- I worked at IT school in my hometown, Namangan. During this time I teached to students about Computer Administration what is Hardware and ,Software,data recovery, OSs and fix them completealy. And Python basic and OOP for beginners. Of course it is not a big or prefect experience but I got so many useful thing and knowledges

#### Python backend developer

Ziffler Co. & Fayzbarakametal

- I created telegram bots for both Ziffler and FayzBarakaMetal companies collobrated with django admin panel. And this bot for only salers and company members. And the function is report and shows all products, sold products, customers and dinamik category. I spent about a month for these projects for each other

2022 -2023
